*Subject: Optex OA-202C Sensor
Date: 5-17-04*

It is the opinion of Automatic Storefront Service Inc, that the OA-202C sensor manufactured by Optex has been a very reliable sensor with out any failures in detection and presence activation.

This sensor is used exclusively with our Gildor SLM Automatic Sliding Door, it's unique design allows us to recess this sensor in the header housing thus keeping it concealed from normal damage.

We also utilize this sensor on Automatic Swinging door's and have found it to be as reliable as it is with the Automatic Sliding Door.
